[TYPE EQUIPMENT NAME]

[TYPE HULL AND P/S NUMBER]

**PDID-TDAT
TECHNICAL DATA**

Technical data to support the Buyer's design development shall be included in the Offeror's technical proposal. If the Offeror's proposal is accepted, the data provided will be used as the basis for ship design. Only firm data can be used for this purpose. Firm data is data which represents established design information for the product offered. If some additional design work is required to complete the information, the data is then considered tentative. Finally, other information will not be available in any form until after detailed design is complete after purchase order issue. Technical data shall be provided in accordance with the following instructions.

INSTRUCTIONS:

1. Data to be provided:
 - 1.1 General Data
 - 1.2 Foundation Data
 - 1.3 Mechanical Data
 - 1.4 Piping Data
 - 1.5 Electrical Data
2. The preferred method of providing the data is by drawings.
3. **Indicate on each document if the information is firm or tentative.**
4. Indicate on a copy of this PDID which data will not be available until after detailed design is complete.
